## Case Study

Powering CEVA's Next Generation of  
Project Logistics with Logiswift

# INTRODUCTION

## LOGISWIFT - CEVA

---

### CEVA

**CEVA Logistics** is a global leader in freight forwarding, contract logistics, and project logistics, supporting energy, infrastructure, and industrial sectors. With a strong international network, the company manages complex project cargo and end-to-end supply chain operations for EPCs and major industries worldwide.

### THE PROJECT

CEVA Logistics partnered with Logiswift to support and standardize its global project-logistics operations. Under this collaboration, Logiswift's system is being deployed across **7 CEVA hubs** and **40+ branches** across the globe, where more than **700 users** will streamline their project logistics operations.

The initial phase of the collaboration focused on providing **end-to-end visibility across projects, milestones, and regions**. As the rollout progressed, the scope expanded to include CEVA's **material management for hub inventory control**.

CEVA became the first to pilot **Nova Chat**, Logiswift's AI-driven chatbot designed to simplify information access and reduce daily operational workload.

### OUR ROLE

**Within a single system, Logiswift provides CEVA with a centralized platform that connects:**

- **Shipment visibility**
- **Operational milestones**
- **Hub-level material management**

The solution supports CEVA's teams with real-time status updates, configurable workflows, and detailed dashboards that highlight performance, exceptions, and inventory activity.

With AI Nova Chat, CEVA users can interact with the platform conversationally, retrieving information and navigating tasks instantly.

“Since implementing Logiswift the visualization of supply chain data have become far more efficient and reliable. Its flexibility, user-friendly design and easy customization allow us to adapt customer requirements effectively. The system seamlessly incorporates our customers’ own platforms, streamlining data flow and reducing manual effort.

It has also replaced the numerous reporting tools we used in the past, giving us one unified source of truth and significantly improving the quality and consistency of our data. With full end-to-end visibility and real-time insights, we can identify issues faster, make better decisions, and deliver more consistent, transparent service to our customers.”

- Georg Bödeker  
Project Logistics, Global Commercial Contracts & Implementation Head

## HOW LOGISWIFT SUPPORTS CEVA

### Global Visibility Integration

Centralized shipment events, milestones, and documents into one real-time platform for all CEVA hubs.

### Inventory & Material Coordination

Digitized warehouse and hub inventory processes to give teams accurate, real-time material visibility.

### Operational Milestones

Automated milestone tracking and alerts to keep projects on schedule and reduce manual follow-ups.

### Workflow Optimization

Unified CEVA’s regional operations under digital workflows aligned with project needs.

Network Dashboards

Document Management

AI Chatbot

## KEY ADDED VALUES

Without changing the existing ecosystem, Logiswift aggregated data across systems to deliver unified, real-time visibility. This enabled CEVA Logistics to retain its existing TMS while significantly reducing operational effort, manual coordination, and cost.

While no WMS replacement was required, the measurable gains in visibility, control, and execution efficiency led CEVA to strategically adopt Logiswift’s execution layer for hub and material management. As part of this consolidation strategy, CEVA will be retiring two legacy WMS platforms in 2026 and standardizing on Logiswift WMS.

# END-TO-END VISIBILITY

Logiswift introduced a unified visibility platform that connected 7 CEVA hubs and centralized all shipment milestones and updates. This eliminated data silos, reduced manual follow-ups, and improved decision-making efficiency.

Dashboards that consolidate KPIs and shipment status for easier performance monitoring

Real-time inventory management across all CEVA hubs

Financial reports that keep track of project budgets and expenses

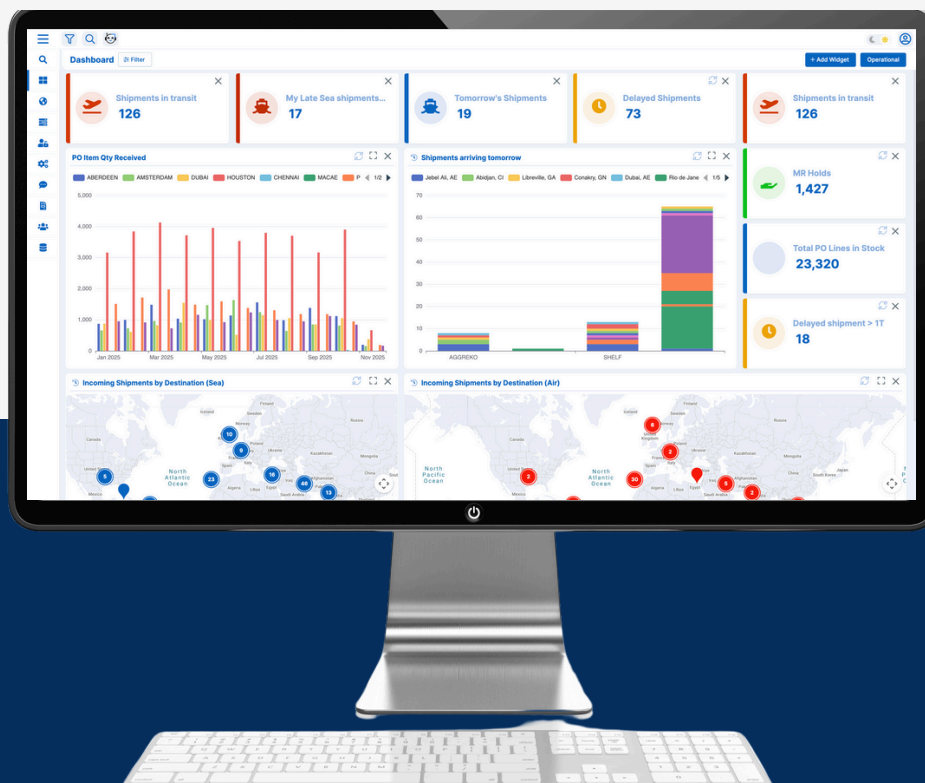

Configurable operational processes that align with CEVA's project-specific requirements

Analytics to track vendor performance and on-site delivery completion levels

Centralized visibility of project history & operational insights within a user-friendly interface

# MATERIAL MANAGEMENT

---

Logiswift expanded CEVA's platform to digitize warehouse and inventory operations, giving teams real-time material visibility and standardized processes across all project hubs.

Connected hub activity to overall project timelines, ensuring full traceability from inbound receipt to jobsite delivery.

Newly designed RF Module that ensures precision and additional functionalities in material receipt processes

Streamlined data entry, and enabled consistent material handling across all hubs.

Provided real-time visibility into inventory allowed teams to plan jobsite requirements more accurately, reducing delays caused by missing or inaccurate stock data.

# AI CHATBOT

CEVA became the first Logiswift partner to pilot the AI Assistant and chatbot, gaining early access to conversational analytics across its operations. By integrating these tools into daily workflows, CEVA teams were able to turn natural-language questions into instant insights, reports and interactive widgets. This early adoption accelerated data accessibility and brought real-time intelligence directly to operational teams.

# LOGISWIFT FOR PROJECT LOGISTICS

Logiswift is the technology platform provider that simplifies Project Forwarding by connecting the logistics interface and third-party management. We have set a new standard for Project Forwarding by creating the smartest one-stop-shop IT service solution for the industry that covers the full cargo life cycle. Plan, source, optimize, collaborate, execute, analyze, and make the right decisions to adapt to unforeseen challenges and remote locations. We are offering the real End to End visibility the industry is looking for.

Logiswift is your key enabler for efficient and sustainable logistics.
